EDUCATION

SHANGHAI JIAOTONG UNIVERSITY
Bachelor of Engineering in Industrial Design, with a minor in English *Sep 2021 – Jun 2025*

NATIONAL UNIVERSITY OF SINGAPORE
Exchange Program (Coursework) *Jan 2024 – May 2024*

EXPERIENCE

DIGITAL CREATIVE ASIA (UX/UI DESIGN & CONSULTING)
Junior UX/UI Designer – Brand & Loyalty *Aug 2025 – Feb 2026*

- Hotel Resort Mini-Program & Application in Macau (Brand & Loyalty Program)
  - Designed and refined user interfaces for a large-scale loyalty program, including a hotel resort mini-program and mobile app in Macau, ensuring seamless and visually engaging user experiences.
  - Created wireframes, user flows, and interactive prototypes tailored to the hospitality context, facilitating intuitive navigation and feature discovery.
  - Collaborated with cross-functional teams to translate user needs and business goals into effective design solutions, maintaining consistency with brand guidelines and design systems.
  - Developed the membership loyalty interface, enabling easy point tracking, reward redemption, and access to exclusive benefits.

LEMONBOX (E-COMMERCE)
Product Manager/UX Designer Intern – Commercialization, Marketing *Feb 2025 – Jun 2025*

- Membership System Design:
  - Designed a five-tier membership system based on user consumption data, incorporating dynamic promotion/demotion rules and exclusive benefits to drive repurchases and differentiate core user groups. Owned end-to-end UX design, authored PRD documents with full business processes and test cases, and coordinated with design, engineering, and operations teams to ensure successful launch.
- Mini-Program E-Commerce Platform UX Optimization:
  - Optimized the user journey on the mini-program, increasing conversion rate by 1.5% and average order value by 8%. Enhanced the merchandise redemption experience, boosting redemption rate by 4.2% with 150% month-over-month growth; automated redemption workflows reduced manual processing time for the operations team by 60%.
- AI Calorie Manager Project:
  - Led end-to-end product design, guiding engineering and operations teams through Alpha/Beta testing and official launch. Integrated membership tiers into usage permissions to further drive order conversion.

NTT DATA (IT CONSULTING, DIGITAL MARKETING)
UX/Consulting Team Intern – Research, Localization, Visualization *Jul 2024 – Sep 2024*

- Conducted UX localization for a global automotive brand's bilingual (English/Chinese) mobile app, enhancing cross-cultural user experience.
- Delivered benchmarks and competitive analysis reports for an overseas healthcare group's official website bidding proposal.
- Designed UI visuals for a major retail brand's holiday marketing campaign proposal.

SKILLS

Programming Language: Python, C#
Analytics: Python, Excel, JMP Pro
Design: Figma, Rive, ProtoPie, Photoshop, After Effects, Blender
Development: React, Unity Engine

ACADEMIC PROJECTS

PlanetPal — Affective AI interactive application *Feb 2025 – Jun 2025*

- Developed an interdisciplinary mobile application designed to convert eco-anxiety into pro-environmental behaviors through emotional interaction design and a growth-oriented virtual companion.
- Frontend Development: Migrated the frontend framework to React, integrating Live2D Cubism to create a dynamic character that evolves visually based on user engagement and completed eco-goals.
- AI & NLP Integration: Engineered an empathetic chatbot using Qwen API (LLM) and NLTK for real-time sentiment analysis, enabling the character to detect user emotions and provide compassionate, context-aware responses.

Ankle-Pump Exercise Assistance System — Collaborated with Fudan University Shanghai Cancer Center *Oct 2024 – Dec 2024*

- Developed a comprehensive medical assistance system for chemotherapy patients to prevent Deep Vein Thrombosis (DVT) through guided ankle-pump exercises.
- Hardware Prototyping: Engineered a servo-assisted device using Arduino, IMU sensors, and vibration motors to provide physical assistance and real-time haptic feedback on movement quality.
- Software Ecosystem: Designed and built a dual-platform system including a Mobile App (for patient reminders, device control, and progress tracking) and a Web Dashboard (for medical staff to monitor compliance and manage patient data).
- Backend & Data: Implemented a cloud database using Appwrite (Python SDK) to synchronize data between the hardware device and the management software, enabling real-time monitoring.

Quantitative UX Research *Apr 2024*

- Led a quantitative study to evaluate interface refinements for the YoloFoods e-commerce platform.
- Designed a mixed-model experiment (12 conditions) and implemented the testing environment using React and Appwrite.
- Analyzed user performance data (task time, misclicks) using JMP Pro and Python, employing Mixed-model ANOVA to determine statistical significance.
- Identified that a sticky navigation bar and a visual indicator (arrow) significantly increased ease of use and reduced error rates, providing data-driven recommendations for interface refinement.

VR Mental Consulting Experience *Mar 2024 – Apr 2024*

- Designed and developed an immersive VR application to provide accessible mental health support for General Anxiety Disorder (GAD).
- Led the end-to-end visual and interaction design, modeling a soothing, semi-open environment in Blender and implementing VR mechanics in Unity.
- Integrated GPT-4 and speech processing APIs (Hugging Face, LMNT) to create a real-time, voice-driven AI consultant, enabling natural conversation and dynamic scene responses.
